DATE OF INFO.

SUPPLEMENT TO
REPORT NO.

25X1X

1. The DWK prepares a so-called hasty report (Schnellbericht)
each month on production of key items in key factories.
These reports cover German factories only, figures for SAGs
are not included.

2. Attachments I, II, and III are taken from the Schnellbericht
for June 1949. Figures from previous periods are given for
comparison.

3. In Attachments I and II the figures for the first half of
1949 and for the month of June respectively represent total
production. In cases where only part of the factories pro-
ducing a certain item report on the Schnellbericht, the DWK
calculates total production of the item on the basis of
records for the preceding period. For example, 10 factories
reported production of 54,297 tons of burnt lime in June 1949;
these 10 factories accounted for 58% of burnt lime production
in the Russian Zone in May 1949, so the DWK calculates total
production for June to be 92,098 and enters this figure in
the table in Attachment II. However, in most important items,
the factories picked by the DWK for the Schnellbericht are
responsible for all production. This is true of coal, iron
and steel, chemical products, cellulose, and others. In
Attachment III the DWK has listed production only as reported
by the factories without any calculations. Column two of
Attachment III shows the percent of zonal capacity covered
by the reporting factories, so that it is possible to calculate
total production from this table.
